

2 February, 2004

From: Mr. Bill Holtzclaw

To: WO Bill Weppner, ALFT Operations Officer

Subj: TRIP REPORT; NCO MTT TRAINING AMMUNITION MANAGEMENT
INFORMATION SYSTEM - REDESIGNED (TAMIS-R) SUSTAINMENT
TRAINING

1. Purpose. The purpose of this trip was to support the instructors of the NCO MTT with conducting training on the Training Ammunition Management Information System - Redesigned (TAMIS-R) at Camp Pendleton, CA.

2. Itinerary. Training was conducted on the 28th and 29th of January aboard Camp Pendleton.

3. Background. Mr. Bill Holtzclaw of CACI traveled to MCB Camp Pendleton in support of a request by the OIC, Marine Element, Redstone Arsenal, AL to assist with instruction on TAMIS-R provided by the NCO MTT.

4. Discussion. Training was conducted at the Base Explosive Safety classroom and the 22 area distance learning computer lab. A total of 22 students attended training. Participants ranged from MSgt to LCpl and represented various commands with-in MarForPac to include 3rd FSSG. The first day of training was dedicated to introductory training on TAMIS-R. On the second day students were provided access to the TAMIS-R training site in groups of three with one-on-one assistance where needed. The training scenario involved students playing the roles of regimental and battalion ammunition technicians. Problems with the internet connection were experienced on the second day allowing for only two hours of on-line training.

5. Recommendations. Training appeared to have been received well by all attendees. Students were encouraged to include specific comments on TAMIS-R training in their end of course critiques. Additionally, training continues with instructors at the Marine Element in order for them to no longer require support in this training area for future classes.

W.L. HOLTZCLAW
